

# THE MAGIC CANVAS

## Essence Statement

Nothing is more rewarding for a child than bringing home a finger painting from school and having their parents stick it on the fridge. Relive that feeling with The Magic Canvas, where finger painting is your key to a magical world filled with wizards and monsters. Finger paint your way through a variety of painting based challenges where your creativity is your greatest weapon.

## Game Overview

In The Magic Canvas the player takes control of an apprentice magician, who upon arriving at his Master's house, for his lessons, discovers that an evil wizard has trapped the Master inside of a magical canvas. The player must wield a magical paintbrush to help the Master escape from the magical canvas and defeat the evil wizard.

Inside of the magical canvas the Master has no control over his movement. The Master will react to magical paint applied to the canvas by the player using the magic paintbrush. Each colour of paint will have a different reaction when the Master interacts with it. The Evil Wizard has also trapped hordes of monsters inside of the magical canvas, in an attempt to destroy the Master. Monsters also react to the paint from the magic paintbrush as well. Can you keep the Monsters at bay while guiding the Master to the goal in each level?

In each level the player must use the magic paintbrush and an increasing number of paint colours to guide the Master to the next level.

The player will have a palette where they will select the colour of paint to apply to the magic canvas. Selecting multiply colours of paint without applying thinner to the brush will cause the colours of paint to combine and create new colours with new effects on the Master and monsters trapped within the magical canvas.

Not feeling like a challenge? Why not take a break and flex your art skills in free paint mode? This game mode will allow the player to use all of the games painting tools to create and save paintings they can share with their friends and family. Master using all the in game tools and maybe your Mom will post one of your creations on the refrigerator, if you are lucky.

## Key Features

- **Finger Painting** - Simple touch based controls allow the player to paint interactive environments that in-game characters respond to.
- **Get Creative** - Everyone has a favourite colour. Can you complete The Magic Canvas using only yours?
- **Paint and Save Your Creations**- Free Paint Mode let's players create and save custom paintings using the games touch based painting mechanics.
